

Debt Service Payments of the Province of Buenos Aires

The Ministry of Economy of the Province of Buenos Aires hereby informs that there have not been any modifications whatsoever in the debt service payment procedure of the Notes issued in the international capital markets.

Therefore, the Province has and will continue to pay debt services on the Notes denominated in foreign currency in the currency established under the terms and conditions of each issuance.

In the case of holdings in local custodian accounts, the services made of overseas transfers in foreign currencies can be collected on local accounts in foreign currency or bills in foreign currency. Therefore, it should be noted that the Central Securities Depositary is authorized by the Central Bank of the republic of Argentina to deposit currencies and obtain bills in foreign currency so that the custodian banks may hold these funds until the time of payment in foreign currency or deposit in a local account.
